Would you be interested in a classified section in each Launch Pad? This would include such items as:

1. For Sale
2. Trade
3. Wanted to Buy
4. Personals
5. Ride Exchange
6. Lost and Found
7. Miscellaneous

If you believe such a column would have value please so indicate to your supervisor or turn in an ad to your supervisor. Deadline for ads would be Tuesday noon before the publication of each Launch Pad.

TONGUE TIED

"Now I will show you the area where the model kits are packed and explain to you the kit packing procedures. Here we have a number of girls who —er — ah —well—er—a —uh—they were here yesterday . . ."

This is the ridiculous situation which faced one of our tour guides a few days ago. The kit packers had packed their kits and vanished leaving nothing but an empty corner. This entire part of the operation had been moved overnight to the old blue building. Further growth and expansion brought about this change.

The packers? These members of the Shipping department are now busily engaged in getting settled in their

current quarters. The tour guide? . . . he was last seen going down over the hill muttering to himself . . . The Shippers? . . . are *still* laughing!

MAIL COURIERS

To facilitate the movement of mail and interoffice correspondence in the new building Karen Ransom with Irene Fry and substitute Jo Harris have been appointed as mail couriers. Several times a day they take a prearranged route through the building distributing and picking up mail. The service they render is greatly appreciated.

MORE MOVES

Things have been happening fast in the Engine Manufacturing area... *Mabel I* was moved to her new home a couple of weeks ago. The static thrust stand is now located between the two engine making machines. The new engine drilling machine has been completed by the Machine Shop crew and placed in its designated building. It will be in operation very soon, if not before.

The new engine manufacturing part of the plant was designed for maximum efficiency with an accent on safety. As each new machine takes

its place this department moves one more step toward the most effective operating procedures possible. The employees of this area deserve a word of praise for their productive efforts under the conditions created by this gradual change to the new working area.

BOOB-TUBE BOMBS

. . . a truly remarkable invention — *The same set that puts you and your wife to sleep — keeps the neighbors awake!*

WHO'S WHO

When *June Harris* came to Estes in December 1964, the Mail Room crew handled schools, educators and customer service while the purchasing agent dealt with prospective dealers. June took over the customer service duties, acting as chief correspondent with model rocketeers who wrote in with questions and problems. Soon dealer, educator and school orders became her responsibility. About a year later the work load required that two departments be formed — one called Dealer Sales and the other Customer Service. June chose to supervise the work of the Dealer Sales department.

For many years June and her husband Dan, were ranchers near Tallahassee. This is northwest of Canon City about 32 miles. Quoting June: "It's the prettiest country in the world." Dan and June have two girls — Terry and Carol. Terry who

worked here for almost a year is now married and lives in Detroit. Carol is a freshman at Western State College at Gunnison.

In 1961, June moved down to Canon City to put the girls in high school. Later, following his heart attack, Dan joined them. He is now a member of the county highway crew.

Dan and June still enjoy country-living with a small spread in Lincoln Park. As a result of their experiences on the ranch June and her family are avid rodeo fans. Presently they are sponsors of the "Little Britches" rodeo and keep a number of horses on their own place.

Dealer Sales, under June's leadership, has experienced a rapid growth. There are now five full-time employees in the department, and all indications point toward further expansion and responsibility.

WELCOME NEW EMPLOYEES

Beth Hartman has joined the swing shift crew in the Mail Room. Presently a resident of Florence she has traveled extensively, living in Texas, Ohio, New Mexico and Oklahoma. Beth enjoys horseback riding and collects miniature model horses.

Donna Hale lives in Lincoln Park with her husband, an employee of C.F.&I., and two boys. She is now one of the "swingin'" Shippers here at Estes. Bowling is Donna's favorite recreational activity.

Linda Payne, Canon City, is the newest member of the Mail Room's swing shift crew. She was twirler in the band at Canon High School for four years and was Homecoming Princess her senior year. Linda likes to ride and care for her quarter horse, Lady Tonka.

Bob Owenby has been head cook at the Ranch House Cafe in Canon City for the past three years. He has come to Estes to work in the Photo Lab. Residing in Canon City, Bob enjoys fishing in his spare time.

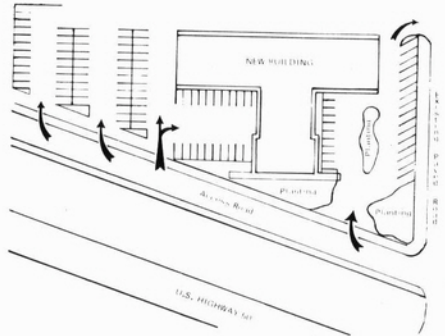

Hey Bob, how about cookin' up a batch of that delicious barbecue for the Co. picnic this summer???

HAPPY BIRTHDAY

<i>Carlene Braswell</i>	May 6
<i>Tom Braswell</i>	May 6
<i>Bertha Merris</i>	May 8
<i>Shari Green</i>	May 13
<i>Lebroah Stephenson</i>	May 14
<i>Keith Kohler</i>	May 16

PARKING LOT

The contractor for the cement retaining walls in the new parking lot has arrived on the scene and has begun work. It is awfully *hard* to make a *concrete* prediction as to the length of time it will take to complete the job.

PERSONAL GLIMPSES

John Zamparelli, after an extended illness, has returned to work. John has been transferred from the Engine Production dept. to the Wood Shop.

The doctors have given *Margie Prather*, Shipping, the good news that her daughter will not have to receive any skin grafts. Veronica May expects to be home before too long.

Betty Poor, Mail Room, wishes to express her appreciation for the cards and the gifts she received while in the hospital.
