## NEW WAREHOUSE

Construction is beginning on another new building. A giant warehouse, 14,000 square feet, is to be erected behind and to the west of the main building here at the plant. This structure, which will be 200 feet long by 70 feet wide with 16 foot ceilings, will contain cement floors, 8" lava block walls

and a double tee pre-stressed concrete roof.

George J. Boyd of Pueblo, the architect, will oversee the construction. Contractor for the excavation, foundation and floor slabs is W. J. Bryan of Canon City. Completion is expected within three or four months.

## A NOTE OF APPRECIATION

A big thanks to all of you who have recently worked your day off and Sundays to keep our operation on schedule. Thank you twice — once for the company and once for

our customers. It's this extra effort which keeps us ahead of the competition.

## FROM THE GRILL

Overheard in the east lunch room:

The cannibal entered the restaurant savoring the thought of a delicious dinner. He found three choices on the menu:

White Merchant	\$2.50
Missionary	\$3.00
Hippie	\$10.00

A little puzzled over the difference in price he asked the waitress if the Hippie was that much tastier. She

replied: "No, not really, but did you ever try to *clean* a Hippie?"
